Panjab University
2017 2020
Percentage: 72.8% %

Projects

- Placement cell System**
Created a website using flask, html, css and postgres SQL for managing placement cell in college. In this student can register themselves and apply for jobs if they are eligible and admin can delete students add and create job and can check statistics of placements
- Pharmacy Management System**
This is a billing software for computer created with Java swing framework and i used JDBC for database connectivity. In this project an admin can create multiple agents who will generate bills of customer s or print their bill or they also can check bill history.
- Hostelr Bay Website**
Created a website on ruby on rails for connecting students of college so that they can communicate with each other and can sell their used goods.
- Modified Linux Scheduler**
By using a system call added a soft realtime value which works as same as virtual run time but before checking vruntime scheduler will check for soft realtime value and the processes with soft real time values will get more priority than others.
